Project Name	IntelliSQL: Intelligent SQL Querying with LLMs Using Gemini Pro
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem–Solution Fit means identifying a real problem faced by users and developing a solution that effectively addresses that problem. In this project, IntelliSQL focuses on helping users who struggle with writing complex SQL queries by providing a natural language interface that converts user questions into SQL queries automatically. This approach helps users access database information easily without requiring deep SQL knowledge.

Purpose

- **To simplify database querying for users with little or no SQL knowledge.**
- **To improve efficiency in retrieving database information using natural language queries.**
- **To provide a user-friendly interface for interacting with databases.**
- **To reduce the complexity and time required for writing SQL queries.**
- **To enhance accessibility and usability of database systems for beginners and non-technical users.**
