Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	4 February 2026
Team ID	LTVIP2026TMIDS86321
Project Name	IntelliSQL: Intelligent SQL Querying with LLMs Using Gemini Pro
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	**Query Input**	**User enters natural language query**
FR-2	**Query Processing**	**System converts natural language to SQL**
FR-3	**Data Retrieval**	**Execute SQL query on database**
FR-4	**Result Display**	**Display results in tabular format**
FR-5	**Data Filtering**	**Show highest, lowest, and average values**
FR-6	**Database Access**	**Retrieve records from student database**

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The system should provide a simple and user-friendly interface.
NFR-2	**Security**	User queries and database access should be handled securely
NFR-3	**Reliability**	The system should consistently generate correct SQL queries.
NFR-4	**Performance**	The system should process queries and return results quickly.
NFR-5	**Availability**	The application should be available whenever users access it.
NFR-6	**Scalability**	The system should handle increasing data and user queries efficien
